

PAWAN FUNDE

Data Analyst

📞 07208433142 ✉ pawanfunde96@gmail.com 📍 Mumbai, India

SUMMARY

Aspiring Data Analyst and Cyber Security undergraduate skilled in Python, SQL, Power BI, and Excel. Experienced in data analysis, dashboard development, and business intelligence through fraud analytics and customer behavior projects. Passionate about leveraging data and security insights to support informed decision-making.

EXPERIENCE

Data Analyst Intern

LAB AT Home

📅 06/2026

- Extracted, cleaned, and transformed raw ELab datasets to design and deploy interactive Power BI dashboards, tracking and analyzing over ₹100 Crore in diagnostic revenue.
- Engineered robust dimensional data models and wrote complex DAX measures to calculate critical business KPIs, including month-over-month (MoM) growth and customer lifetime value (CLV).
- Developed automated Python scripts to perform exploratory data analysis (EDA), successfully identifying operational bottlenecks and analyzing B2B patient referral patterns.
- Translated complex analytics into actionable, data-driven recommendations for executive leadership, proactively flagging financial leakages and optimizing diagnostic test profitability.

EDUCATION

B.Tech • Cyber Security

Shah & Anchor Kutchhi Engineering College

📅 08/2023 - Present 📍 Mumbai

- Pursuing B.Tech in Cyber Security with a CGPA of 8.5. Strong understanding of core Computer Science subjects including DSA, DBMS, Operating Systems, Computer Networks, Software Engineering, and Cyber Security.

CGPA

8.5 / 10.0

Data Analytics with Gen AI

PROJECTS

UPI Transaction Fraud & Performance Analytics

📅 12/2026 - 12/2026

🔗 <https://github.com/pawan3funde/UPI-Transaction-Data-Analytics>

Career 247 · Python (Pandas, NumPy), SQL (Extraction), Power BI, Excel Data Analytics

- Analyzed 100,000+ transactions to identify drivers of transaction success and failure
- Built KPI dashboard tracking success rate, fraud ratio, and transaction trends
- Applied structured analysis to uncover user behavior insights for better system performance

Black Friday Sales & Customer Analytics

📅 01/2026 - 01/2026

🔗 <https://github.com/pawan3funde/Black-Friday-Sales-Data-Analytics>

Career 247 · Python Power BI DAX, Pandas NumPy Matplotlib Seaborn SciPy, Excel

- Analyzed 550K+ retail transactions using Python and Power BI to uncover customer patterns
- Performed data cleaning, feature engineering, exploratory data analysis (EDA), and statistical testing to validate customer behavior insights
- Identified that ~20% of customers contributed over 55% of total revenue
